CONTROLLER USAGE

CLUB SELECT

There are five woods, nine irons, pitching wedge, sand wedge, and putter on the Club Select screen. You are allowed 14 clubs on the course, so you'll have to pick out the clubs you like and leave some behind.

The fourteen clubs that appear in white letters when the Club Select screen appears are the default set. If you want a different selection of clubs, you must delete a club with the X or Y button (turning the letters gray), then select the club you want (turning those letters white). It is possible, though not advisable, to start the game without a pitching wedge or sand wedge, but the game will not start if you try to begin the game without a putter. When you're satisfied with the selection, push the Start Button to begin the game.

1W	260Y	4I	180Y
2W	250Y	5I	170Y
3W	240Y	6I	160Y
4W	230Y	7I	150Y
5W	220Y	8I	140Y
1I	210Y	9I	130Y
2I	200Y	PW	110Y
3I	190Y	SW	70Y

HOW TO PLAY THE GAME

Select a Direction - When you select "SHOT," a white cursor will appear. You move the cursor with the Control Pad, then make smaller adjustments with the L and R buttons.

Check the Lie of the Ball - Once you've decided direction and entered it with the A button, you will be shown the lie of the ball. Make note of it and push the A button to move on.

Club Select - The display in the bottom right will show your clubs and the yardage you can expect from that club. You can run through the list of clubs with the Control Pad and enter your selection with the A button.

Select your Stance - Once you've selected your club the display will show your stance. The left and right arms of the Control Pad will change the position of your feet. Pick the stance you want and enter it with the A button.

SHOOTING LIKE A PRO

Hook Shot - Curving the ball to the left is called a Draw, curving it a lot is called a hook. Pulling your right foot back in your stance will cause the ball to curve to the left.

Slice Shot - Curving the ball to the right is called a Fade, curving it a lot is called a slice. Pull your left foot back to curve the ball to the right.

Topspin - Topspin can help compensate for wind speed, and spin the ball forward when it lands. Push the upper arm of the Control Pad during your swing to get some topspin.

Backspin - Backspin will spin the ball back toward you when it lands. Push the lower arm of the Control Pad as you shoot to get backspin.

MODE SELECT

Press the Start button, and the Mode Select screen will appear. Choose a mode by moving the cursor with the Control Pad and entering your selection with the A or B Button.

STROKE PLAY - One to four players. The best overall score for 18 holes wins.

MATCH PLAY - Two players compete head-on.

Each hole is scored separately, with the winner of the most holes winning the match.

TOURNAMENT - One to four players enter an 18-hole tournament against 60 computer-chosen players.

VS HAL - Play the Hal professional in direct competition. If you win, he will give you a password enabling you to get a set of the metal woods he uses. Once you have this password, you can use the metal clubs in any play mode.

PRACTICE - After entering the practice mode, pushing the Start button will display a command screen allowing you to select a hole, wind speed, and wind direction. In Practice Mode, selecting EXIT will take you back to the title screen. Pushing the Select button will let you try your last shot again.

MEMORY PLAY - If you get a Hole-in-One, an Eagle, or an Albatross, you will be given a password. Enter it in Memory Mode and watch a replay of your shot!

GETTING STARTED

In the Command window in the lower right of the screen are 3 selections:
Shot - Used to set up a shot.
Green - Lets you scroll around the green and fairway.

Hole - Lets you go into Display Mode, showing closeups of the screen, etc.

We will describe each of these sections and explain how to use each command. As usual, you move the cursor with the Control Pad, enter selections with A or B button, and cancel selections with the X or Y button.

How to Swing - The swing method takes a little practice to control properly, but once you get the hang of it, it's really accurate. To complete a shot you'll have to hit the A button 3 times in rapid succession. The first time will start your backswing. You will get maximum power and distance if you let the head of your club go all the way into the red before you stop it by pushing the A button a second time. Then you have to connect squarely with the ball. Timing your shot well, push the A button a third time to connect with the ball.

Putting - You can set the direction of your putt with the Control Pad and fine-tune it with the L and R buttons. You have to push the A button twice when you putt. For a tip-in, just push the A button once.

Checking the Green - You can select "GREEN" in the Command window at any time during play to see the green.

MEMORY SHOT

If you manage to get a Hole-in-One, an Eagle, or an Albatross, you will get a password that, when entered into the Memory Shot section of the game, will replay your shot for you.

SCORECARD

At any point during play, you can push the Start button to take a look at your scorecard. The scorecard will show the number of strokes (STROKE) and the number of putts (PAT) taken on each hole.

TERMS

- Bogey** - 1 over par
- Double Bogey** - 2 over par
- Triple Bogey** - 3 over par
- Par** - Number of shots per hole
- Birdie** - 1 under par
- Eagle** - 2 under par
- Albatross** - 3 under par

NUMBER OF PLAYERS

Select one to four players. Players 1 and 3 can use controller 1, and players 2 and 4 can use Controller 2. It is also possible for all four players to use one controller.

LEVEL SELECT

Three levels, Amateur, Single, and Professional, are available. The difficulty level increases as you go up in levels.

NAME ENTRY

Used to enter your name, and to enter the metal wood password.

Enter your selections with the A button.

HANDICAP

In multi-player Stroke Play mode, each player can be assigned a handicap of 1 to 36 strokes.

CHECKING OUT THE HOLE

Selecting HOLE at the Command Screen will let you take a close-up look at the terrain of the hole.

Replay - REPLAY will play back your last shot in 3-D.

Slope - The Slope feature will give you a detailed layout of the terrain of the current hole, allowing you to plan your shots and strategies well. Each of the squares in the graph is ten yards square.

Zoom - The Zoom feature will magnify any designated area in the hole layout. When you select the ZOOM feature, a section of the hole will be highlighted. By moving the cursor to the spot you want and pushing the A button, the section you picked will be magnified by a factor of 2. You can then select SLOPE again and the grid will be laid over the magnified section.

Cut/Zoom/Slope - After cutting away the area of your choosing, select the Zoom and Slope features to view a detailed close-up of the terrain's slope.

Cut - The Cut feature can make it easier to see the slope of the hole more exactly. By selecting the Cut feature and adjusting the cursor with the left and right arms of the Control Pad and enter it with the A button, the display will show a cross-section of the terrain.

Move the cursor left or right to the point you want to cut off. Press the A button to display the part you want to see.
